

# SIMPLIPHI YOUR POWER WITH

## AccESS TO ENERGY STORAGE & MANAGEMENT

Energize and protect your home or business from power outages and lower your utility bills with a **safe, simple, reliable** and **practical** energy storage system.

*Installation should be completed by a licensed C10 or C46 installer.*

### Simple

- Easy to use power storage solution
- All equipment you need in one enclosure: PHI batteries + built-in-inverter + monitoring and control
- Seamless integration with new or existing solar installations
- Keeps power on for your critical loads during grid outages
- Programmable for TOU, peak-shaving, self-consumption and back-up
- On- or off-grid
- No thermal monitoring, cooling, fire suppression or ventilation equipment required
- No maintenance

### Practical

- Stores electricity from solar, wind, diesel/gas generators, the grid or any combination
- Enclosed in a NEMA-3R rated cabinet for safe indoor and outdoor use in all climates
- Remote system monitoring by web browser or mobile device app
- Internal transfer switch automatically disconnects from the grid during power outages and provides back-up power
- Scalable to meet any energy requirement by connecting additional enclosures

### Reliable

- 10-year warranty on PHI batteries with 10,000 charge/discharge cycles over lifetime
- High efficiency rate — more usable power for you
- Operates in broad temperature range of -4 to 120 degrees F
- Delivers multiple charge/discharge cycles per day

### Safe

- Environmentally benign and non-toxic Lithium Iron Phosphate (LFP)
- No Cobalt - no hazards
- No risk of overheating or fire
- No fumes or out-gassing
